Coalfire Exposure Management

Minimize Exposure, Maximize Defense: A Programmatic Solution for Evolving Threats

In today's rapidly moving threat landscape, managing your attack surface requires more than visibility—it demands continuously updated, intelligence-driven prioritization. Coalfire® Exposure Management, powered by Tenable One™, integrates a threat-informed approach to uncover unknown assets, maximize discovery efforts, and apply real-world threat intelligence to contextualize and prioritize risks. By aligning vulnerabilities with threat actor activity, asset criticality, and network exposure, our team of industry experts prioritize the risks that matter most to keep your team focused on remediating high impact vulnerabilities. From comprehensive inventory creation to precise remediation and targeted program performance metrics, Coalfire's programmatic exposure management empowers your organization with the expertise to minimize exposure, mitigate critical vulnerabilities, and stay ahead of emerging threats while preserving stakeholder alignment.

Program Capabilities

Continuous Attack Surface Management
Gain a complete and up-to-date understanding of your digital footprint.

Continuous asset discovery ensures that all internet-facing assets, including those that are intentionally deployed, forgotten, or created inadvertently, are identified. Our comprehensive discovery methodology automatically scans domains, subdomains, IP addresses, cloud resources, and third-party assets to build a dynamic inventory. By leveraging Tenable's continuous monitoring and real-time alerting capabilities, Coalfire Exposure Management eliminates blind spots and provides a solid foundation for proactive security measures.

Threat-Informed Vulnerability Scanning
Perform holistic vulnerability scanning and reporting to ensure no threat goes unnoticed.

By combining automated discovery techniques with contextual threat intelligence and dark web monitoring, we deliver a complete view of your attack surface and its vulnerabilities. Leveraging Tenable One™, our scanning approach incorporates asset criticality, network exposure, and active threat exploitation to prioritize risks effectively. Detailed, actionable reports align with relevant solution teams, enabling targeted remediation while minimizing operational disruption. With clear metrics, defined exclusion criteria, and continuous process improvements, stay resilient and proactive for evolving threats.

Why Coalfire Exposure Management?

74% **Of CISOs report human error as most significant cyber vulnerability**
Source: Proofpoint's 2024 Voice of the CISO

67% **Assets affected by CVE's 730 days or older that remain unpatched**
Source: Tenable VMS Data October 2024

96% **Assets affected by CVE's released within the last 7 days that remain unpatched**
Source: Tenable VMS Data October 2024

194 days **Average time to identify a breach**

Threat-Informed Risk Prioritization
Leverage a threat-informed approach to prioritize risks with precision and context.

By evaluating asset criticality, network exposure, and real-world threat intelligence, including active weaponization and exploitation by threat actors, Coalfire helps you focus on vulnerabilities that pose the greatest risk to your organization. This targeted prioritization ensures resources are directed where they're needed most, enabling faster, more effective remediation. With detailed reporting and actionable insights, Coalfire Exposure Management empowers your teams to stay proactive and aligned with the evolving threat landscape, reducing exposure and strengthening your security posture.

Comprehensive Remediation Management
Deliver comprehensive remediation management to address vulnerabilities with precision & efficiency.

By targeting top-ranked threats, coordinating with relevant solution teams, and establishing clear service level agreements (SLAs), we ensure timely resolution of critical issues. Escalation processes are in place to address unresolved vulnerabilities, minimizing risk while maintaining business continuity. With a focus on prioritization and collaboration, our approach streamlines remediation efforts, providing actionable insights and measurable outcomes to strengthen your organization's security posture and effectively reduce dangerous exposures.

Why Coalfire?

World-class Partnerships

Strong partnerships with leading security vendors ensure access to cutting-edge solutions, tailored integrations, and proven reliability. By aligning with industry leaders, Coalfire delivers unmatched value, empowering our clients with the tools they need to stay secure.

Tailored Delivery Experience

Coalfire experts are dedicated specialists in specific frameworks, ensuring tailored solutions for each client. They understand the entirety of our client's business and function as strategic partners rather than just one-time vendors.

Measurable Success

Regularly tracking success and optimizing processes ensures clear progress, accountability, and real-time insights. Coalfire's proactive approach sets us apart, empowering you to adapt quickly, achieve measurable results, and stay ahead of evolving security threats
